

INSTALLATION GUIDE

Strap Installation Guide:

Step A - Insert prongs into aperture and “click” secure. The strap will “stay in place” for future jobs! – No need to remove!

Step B - Wrap strap around tube, locate ‘T’ aperture over lug and secure.

To Release:

Step C - Pull down on “T bar” to release.

Safety Notes:

- ✓ Hexguard© must be fitted with a minimum of two straps or cable ties.
- ✓ Always release straps or ties before removing the Hexguard© panel.
- ✓ Never drop Hexguard© off scaffolding as this may harm people below.

*Our unique installation system ensures that securing HexGuard© is as simple as **A, B, C!***
